Subject: FW: Location EDDs for West Lake Landfill
Locations March 18 2013.xlsx

Oops, here's the file.

Dan,

As I had stated in my previous e-mail, I made corrections to your EDD and returned it to you. However, you corrected the original file you sent me instead of working with the modified one I sent to you. I went ahead and went back through the EDD you just sent and make the changes again. The EDD is now loaded into EQuIS. I have attached the final EDD that I uploaded to EQuIS. Delete the location EDD you sent me and save this one instead.

Congratulations, your site database now has 78 monitoring wells established. Now that we've got the locations, I'll work with the chemistry EDDs you sent to see if we can get some of it loaded.

Brian

Brian, fixed the dup lines and coordinate issue. Thought I had caught all of those...

Dan,

I made a couple of modifications to the file as we discussed. The revised EDD is attached below. I then ran it through the EDP. It generated the error log attached below. After you make the corrections, send it back and I'll upload.

Brian, here are the two EDDs with locations and project manager information for West Lake. I applied the changes we identified previously to these EDDs so hopefully there won't be any repeat errors.
